

COLUMBIA JUNIOR HAND CANCELING MACHINE

(Latest Model)

REBUILT \$99 ON TERMS
 (All prices F.O.B. Silver Creek, N. Y.)

Rubbers as per
 List Below \$4

Postmaster:

Our files show that you have a Columbia canceling machine in use. These Columbia machines in service today have seen anywhere from one to 25 years of continuous service. Recently, in response to a special offer, we rebuilt quite a few of these machines.

If yours is of the model above and if it has NOT been rebuilt recently, it should in all probability have a new drive belt and all new rubbers. Often the installation of a new drive belt and rubbers makes the machine run like new and it also runs easier.

This is the best possible time of the year to do this, and so we are making herewith a special offer. It costs only \$4 for everything you need in the way of rubbers and drive belt. It is only recently that we had a stock to send such supplies, as on account of the war our stocks have been extremely low and while the quality was poor we simply did not buy. The last lot of drive belts we have received is the best we ever had and the drive belt is the life of your machine.

The following covers everything you are likely to need:

1 drive belt	\$1.75	2 feed rubbers	\$1.00
1 round rubber feed belt	.50	1 friction band	.75
		2 trip pressure rubbers	.70

ALL FOR \$4 IF CASH WITH ORDER.

TOTAL \$4.70

Think this over and let us hear from you.

➔ **YOUR MACHINE PUT IN FIRST-CLASS WORKING CONDITION FOR ONLY \$4.**
